Profile

Experienced Penetration Tester with CEH And ISO 27001,27701,9001,20000-1 Lead Auditor certifications, specializing in VAPT for web applications, APIs, and network security. Skilled in manual and automated testing, vulnerability identification, and implementing security solutions. Currently aiding my organization in becoming an NABCB certification body. I've managed network infrastructure, including patch panels, IP phones, and CCTV systems. Committed to strengthening cybersecurity and ensuring compliance.

Professional Experience

2024/08 – present	Associate Cyber Security Test Engineer <i>John & Smith</i>
Calicut, Kerala	• Conducted comprehensive web application penetration testing to identify and remediate vulnerabilities such as SQL injection, XSS, and CSRF • Performed API security testing to uncover vulnerabilities, ensure secure data handling, and prevent unauthorized access. • Conducted manual penetration testing to exploit real-world vulnerabilities and provide tailored remediation advice • Collaborated with development teams to implement security best practices and secure coding techniques. • Actively participated in the offline assessment phase of the CERT-In empanelment process

Education

2024/11 – present	M.Sc. Computer Science <i>University Of Kerala</i>
2023 – 2024	Advanced Diploma In Cyber Defense <i>Red Team Hacker Academy</i>
2020 – 2023	BSC. COMPUTER SCIENCE <i>Calicut University</i>

Skills

Tools — Burpsuite | Nmap | Netdiscover | Nessus | Nikto | OWASP ZAP | sqlmap | wpscan | John the Ripper | Hydra | Wireshark | Hashcat | Netcat | LinPEAS | Binwalk | Shodan | Metasploit | Bloodhound

Programing — Python | Java | Java Script | HTML | SQL

Operating Systems — Kali Linux | Windows

Pentesting Domains — Web | Network | API

Networking & Security — Router Configuration | Switch Management | Network Traffic Analysis

Security Standards & Compliance — ISO 27001 | OWASP Top 10 | ISO 27701 | ISO 9001 | ISO 20000-1

Reporting & Documentation — Security Report Writing | Vulnerability Documentation

Certificates

- CEH V12
- ISO 27701 L A
- ISO 9001 L A
- ISO 27001 L A
- ISO 20000-1 L A

Projects

Web Application Vulnerability Assessment and Penetration Testing

Conducted a thorough security assessment of a simulated e-commerce web application using tools such as Burp Suite, OWASP ZAP, SQLmap, Nikto, and Nmap on Kali Linux. The project focused on identifying and exploiting common web vulnerabilities based on OWASP Top 10. Performed both manual and automated testing and documented findings with severity levels, proof-of-concept screenshots, and remediation recommendations to strengthen the application's security posture.

Key Vulnerabilities Identified:

- **Unrestricted Resource Consumption** (lack of rate limiting)
- **Broken Object Level Authorization (BOLA)**
- **Sensitive Data Exposure** (unencrypted transmission of credentials and personal data)
- **Missing Security Headers** (Content-Security-Policy, X-Frame-Options, Strict-Transport-Security)
- **Information Disclosure via Verbose Error Messages**
